March 8, 2026

Dear Hiring Manager,

I am excited to apply for the open Developer position. With hands-on experience building SwiftUI applications in travel, gaming, and civic-tech domains, I bring a strong background in accessibility-first product design and end-to-end app development. My work spans wire framing, architecture, implementation, and testing, with a focus on shipping user-centered features using Apple frameworks.

I am currently completing the Apple Developer Academy program where I've gained hands-on experience in iOS development, product strategy, and teamwork. I will graduate in May 2026.

At the academy, I had the opportunity to start an internship with We Change Community Consulting, where I am delivering a multi-module AI-powered civic platform, integrating spatial data and campaign management. I also built SlotParking, a real-time parking management app for Detroit, leading field testing and partnership outreach with lot owners. As lead developer for Stamped!, my first-person project on the App Store, I designed and built a city passport app, implementing accessibility improvements and AI-assisted travel tools. My technical skills include Swift, SwiftUI, SpriteKit, Firebase, and web technologies, supported by a solid foundation in MVVM architecture and product prototyping.

I have also begun experimenting with web development, creating my own portfolio and a website to teach myself and others more about coding. This hands-on approach has strengthened my skills in HTML, CSS, JavaScript, and user experience design, while allowing me to share knowledge and support fellow learners.

I am a reliable, organized, and adaptable collaborator, committed to continuous progress and respectful teamwork. My experience with cross-functional teams, attention to detail, and strong work ethic make me a valuable asset for your development projects.

Thank you for considering my application. I look forward to discussing how my skills and experience can contribute to your team's success.

Sincerely,

George Clinkscales, JR.
